Bluetooth Wireless Stereo Headphones/Headset

2 Products in 1!

- Wireless Headset for mobile phones, cell phones, Skype, and PC gaming
- Wireless Headphones for music from any Bluetooth A2DP sound source

Model 4380

For great sounding music, these stereo headphones team up with any computer, MP3 player, iPod, mobile phone, cell phone, or other music source with Bluetooth A2DP capability, including music players connected to Zoom iHiFi Transmitters. This comfortable headset with built-in, fold-down microphone is also outstanding for phone conversations, and competitive banter while PC gaming. The Model 4380 works with virtually any Bluetooth-enabled mobile phone or cell phone, or a Bluetooth enabled computer. You can even listen to music, seamlessly switch over to a phone call by touching the handy control button on the headphones, and then resume music play without missing a beat.* And it's easy. Link to compatible Bluetooth devices automatically, with no computer or software required.

Controls on the Headset allow you to adjust volume, play/pause/stop music, advance and reverse the track selection, and power the headphones on and off. The Model 4380 has padded earpieces to provide hours of continuous comfortable use. The headset folds for easy storage in a pocket or purse. The headphone connector is designed for the band to be worn behind the neck and over the ear.

The Model 4380 is powered by a rechargeable Lithium battery. The battery is recharged through a USB port.

* Remote control of iPods through the headphones requires a Bluetooth transmitter with AVRCP control of the iPod, such as that provided by the Zoom 4355 iHiFi transmitter/receiver.

The ability to toggle between stereo audio and telephony applications on a PC requires a Bluetooth adapter that can maintain both an A2DP/AVRCP (audio) profile and an HSP (headset) profile concurrently when connecting to the Model 4380. That dual profile feature is found on the Zoom Model 4311 or Zoom Model 4321 Bluetooth adapters. Pausing music played from a cell phone or mobile phone requires Bluetooth AVRCP support in the phone.

** Wireless range is subject to variation due to physical obstructions and the presence of interference in the 2.4 MHz radio frequency.

Package contents:

- Bluetooth V1.2 Class 2 stereo headphones/headset
- Cable to charge headphones/headset from a USB port
- Quick-start installation guide in English and Spanish
